MOBILIZING
BUILDING ADAPTATION
AND RESILIENCE

Mobilizing Building Adaptation and Resilience (MBAR)

Design for and by people in the hope that no one is stressed beyond their ability to cope:

- Adapt to climate change stressors and shocks
- Better protect everyone's investments
- Stabilize communities during a natural disaster or crisis

Industry Practitioners:

Aware > Informed > Educated >Trained > Experienced > Committed >>> Transforming Practices Together

Through pilot projects, understand needs, barriers, and the process to create and implement solutions

MBAR Pilots

Transforming Industry Practice

- Through pilot projects, understand **needs**, **barriers**, and the process to create and implement **solutions**
- Identify paths of implementation that are most supportive and effective and will encounter the least resistance.
